

# Sentaurus Tcad Synopsys

The ultimate goal of process simulation is an accurate prediction of the active dopant distribution, the stress distribution and the device geometry. Process simulation is typically used as an input for device simulation, the modeling of device electrical characteristics. Collectively process and device simulation form the core tools for the design phase known as technology computer aided design (TCAD). Considering the integrated circuit design process as a series of steps with decreasing levels of abstraction, logic synthesis would be at the highest level and TCAD, being closest...

Semiconductor process simulation It is a branch of electronic design automation, and part of a sub-field known as technology CAD (TCAD). and in 2004 Synopsys acquired ISE. Synopsys combined the features of Taurus and TSUPREM4 Semiconductor process simulation is the modeling of the fabrication of semiconductor devices such as transistors. In 2002 Synopsys acquired Avant. not been sold commercially. , corp

List of EDA companies Comparison of EDA software Cadence Design Systems: Acquisitions and mergers Synopsys: Acquisitions, mergers, spinoffs Autodesk 123D apps, Autodesk &quot;PathWave A list of notable electronic design automation (EDA) companies
