Pleurisy Paracetamol (acetaminophen) and ibuprofen may be used to decrease pain. Other symptoms may include shortness of breath, cough, fever, or weight loss, depending on the underlying cause. This can result in a sharp chest pain while breathing. Occasionally the pain may be a constant dull ache. Incentive spirometry may be recommended to encourage larger breaths. About one million people Pleurisy, also known as pleuritis, is inflammation of the membranes that surround the lungs and line the chest cavity (pleurae) 0acae7723b

The three types of plague are the result of the route of infection: bubonic plague, septicemic plague, and pneumonic plague. Bubonic plague is mainly spread by infected fleas from small animals. It may also result from exposure to the body fluids from a dead plague-infected animal. Mammals such as rabbits, hares, and some cat species... 0acae7723b HIV/AIDS 0acae7723b

Bubonic plague One to seven days after exposure to the bacteria, flu-like symptoms develop. Occasionally, swollen lymph nodes, known as "buboes", may break open. blood cultures test blood samples for bacteria to find source of infection Lungs: Spirometry test are used to screen the lungs for diseases that affect the Bubonic plague is one of three types of plague caused by the bacterium Yersinia pestis. Acral necrosis, the dark discoloration of skin, is another symptom. These symptoms include fever, headaches, and vomiting, as well as swollen and painful lymph nodes occurring in the area closest to where the bacteria entered the skin 0acae7723b

Pulmonary function testing [citation needed] The measurements taken by the spirometry device Pulmonary function testing (PFT) is a complete evaluation of the respiratory system including patient history, physical examinations, and tests of pulmonary function. lungs to move huge volumes of air quickly through the airways to identify airway obstruction. PFTs are normally performed by a pulmonary function technologist, respiratory therapist, respiratory physiologist, physiotherapist, pulmonologist, or general practitioner. The primary purpose of pulmonary function testing is to identify the severity of pulmonary impairment. Pulmonary function testing has diagnostic and therapeutic roles and helps clinicians answer some general questions about patients with lung disease 0acae7723b
